**RE: Freightliner - Loss Control – Detroit Diesel – Allison, Miami, FL
January 16, 2008**

Dear Doug:

This letter will confirm my visit to Detroit Diesel – Allison in Miami, FL on January 16, 2008 for the purpose of completing the Freightliner Safety and Health Program Evaluation. The main contact at the Miami location is Mr. Luis Leon, Director of Environmental, Safety and Health.

This location's Safety Program is one of the best I have seen while being a consultant. Mr. Leon takes great pride in the program and it shows throughout the facility.

As an example, Mr. Leon has built a Lockout/Tagout box that encompasses all of the types of lockout that may be encountered at the DD-A facilities. When training all of the employees must show proficiency in the procedure before they are allowed to complete an actual Lockout/Tagout in the garage.

Another example, and one with which I am very impressed with is, Mr. Leon's Respirator and HAZWOPER trainings. Not only does he do the required classroom training but his hands-on training includes putting on equipment in a smoke filled room. It appears to be very effective.

In 2007, DD-A Miami had eight recordable injuries with three of those as lost time. Their frequency rate was 8.5 and the severity rate was 3.2. The injuries were mostly minor in nature. Mr. Leon monitors the injuries and addresses all accidents that occur in Florida.

There were no hazards found on the walkthrough of the facility.

I would like to commend Mr. Leon on the Safety Program that he has set up. He has received commendations from OSHA, EPA and DOT on the completeness of his programs and recordkeeping. The City of Miami has also recognized his efforts at keeping the Miami River free of pollutants.

If you have any questions or concerns, please feel free to call me.

Sincerely,

Bruce E. Malone
Assistant Vice President
